

01

Interview Transcripts

232 WASH key-informant interviews

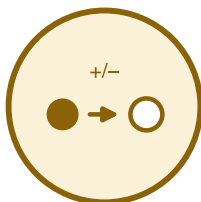

02

PTA Coding Prompt

purposive text analysis coding
rules issued to the LLM as a
version-controlled prompt

03

Causal Statement Extraction

cause–effect pairs with polarity,
challenge/solution label, and a
verbatim excerpt per statement

input data

steps performed by the LLM

deterministic scripted steps

re-running the gray steps on the
LLM's coded statements reproduces
the published networks exactly

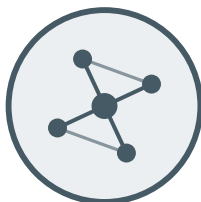

04

Factor Aggregation

context-specific factor names
mapped onto the 17 cross-case
WASH factors · deterministic rules

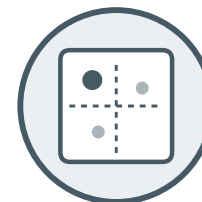

05

Network Assembly

weighted, directed challenge &
solution networks: edge lists
and adjacency matrices

06

Structural Analysis

eigenvector centrality ·
influence–dependence quadrants ·
feedback-loop inventory
