

Interview Transcripts

232 WASH key-informant interviews

PTA Coding Prompt

purposive text analysis coding rules issued to the LLM as a version-controlled, reproducible prompt

Causal Statement Extraction

cause–effect pairs with polarity, challenge/solution label, and a verbatim source excerpt per statement

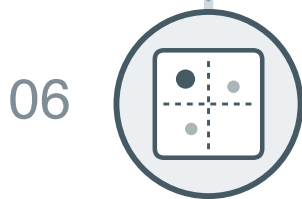

Factor Aggregation

context-specific factor names mapped onto the 17 cross-case WASH factors by deterministic rules

Network Assembly

weighted, directed challenge & solution networks:
edge lists and adjacency matrices

Structural Analysis

eigenvector centrality · influence–dependence
quadrants · feedback-loop inventory

Green: the input corpus. Yellow: steps performed by the LLM (Claude). Gray: deterministic, scripted steps — re-running them on the LLM's coded statements reproduces the published networks exactly.
